Position: Pharmacist

Objective: Ensures pharmacy customers/patients receive medications and medical supplies on a timely basis. Affirms prescription accuracy according to physician's orders. Maximizes customer/patient quality of service within boundaries of expertise.

Duties and Responsibilities:

- Fills prescription orders for all medicinal agents; oral, topical, parenteral, etc.
- Determines prescription assignment for dosage, drug choice, administration, and possible reactions/interactions
- Supervises technicians in prescription data entry, packing oral medications, label and unit dose preparation and assists, when necessary
- Verifies finished work of other pharmacists
- Directs timely delivery of medications and supplies to the facilities
- Checks and sends emergency box replacement and emergency room stock to facilities, as needed
- Receives and fills orders for stock meds, nutritionals and nursing supplies when warehouse personnel are unavailable
- Answers drug related questions and concerns and assists with problem solving for personnel, nursing staff, and patient families in area of expertise
- May assist Lead Pharmacist with special projects as needed and assumes responsibility in his/her absence
- Rotates on-call duty during off hours

Work Experience:

Minimum two-five (2 - 5) years pharmacy experience, preferably in hospital or long term care service
